

UAMPS MISSION

TO DELIVER LOW COST, RELIABLE POWER TO MEMBERS

VALUES

INFORMED DECISION MAKING

We strive to make informed decision-making an integral part of our daily job functions. At the staff level, this will be achieved through targeted training and ongoing education. At the member level, we will foster this practice through monthly meetings and conferences held throughout the year.

INTEGRITY

We strive to be recognized as a trusted voice on electric utility issues. This trust begins with our staff, built through professional and respectful interactions, extends to our members. Our commitment to integrity also ensures the equitable treatment of all members, regardless of their load size.

COLLABORATION

We maximize our effectiveness by aggregating the collective needs of our members. Collaboration begins at the staff level, where teamwork and communication are essential. This collaborative model is then extended to the member level, reflected in all aspects of UAMPS' organizational activities.

ACCOUNTABILITY

We take responsibility—both as staff and as members—for our actions, behaviors, performance, and decisions. Accountability is essential for UAMPS to reach its full potential and deliver the benefits of economies of scale through aggregation.
